Allowable Subject Matter

1. Claims 1-46 are allowed.

Independent claims 1, 30, 32, 41-43, recite a motion estimation and compensation method which includes "...generating a second motion vector based on a refined granularity of the preliminary motion vector; and performing a fractional pixel search using the second motion vector to produce a final motion vector, the final motion vector being used for motion compensation..." which is a feature that is not anticipated nor obvious over the art of record. Dependent claims 2-29, 31, 33-40, 44-46 are allowed for the reasons concerning the independent claims.
